

DOT, TOXICITY AND MONITORING WORKSHOP, SAN ANTONIO, TX, JUNE 2002

The TB Education Center presented a conference entitled ***“DOT, Toxicity and Monitoring”*** to nurses, and outreach workers in San Antonio on June 25-26, 2002 at the Texas Center for Infectious Disease. Participants learned about the four essential elements of Directly Observed Therapy (DOT), the anti-tuberculosis medications used for the treatment of tuberculosis, the adverse side effects of the medications, drug related toxicity, rapport, open-ended questions and personal safety in the field.

Participants listen to *Barbara Seaworth, MD* speak on TB Medications/Side Effects and Toxicity Monitoring/Drug Interactions.

Participants participate in group activities.
